( 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> prize for any component medical societies, not divided into categories )

1. The PMA shall give annually an Award for the Most Active Component Society in Child Advocacy
2. The award proceeds from the premise that the physician’s role as guardian of health and welfare of infants and children and even of those yet unborn is not limited to preventive and curative medicine but extends to the continuing concern he or she should have for them as human beings entitled to the affection, care and protection of society and of the state. This responsibility of the physicians is most effectively exercised in collaboration with his colleagues in the medical profession banded together in component societies as child advocates.
3. As an organized group of child advocates, the component society may undertake activities of the following nature:
  - a. Education of the community in the health care of children and in active respect of their rights.
  - b. Work for the passage of national legislation and local ordinances for the promotion and protection of the child’s right to health
  - c. Publication of articles, pamphlets, books, and other literature bearing on child advocacy
  - d. Measures for the prevention of child abuse in the community and the prosecution of the individuals and public officials responsible thereof
  - e. Institutional care for rehabilitation of abused children and of those improperly cared for by their parents
  - f. Measures taken to protect the youth against drug abuse or to protect children from addicted parents or guardians
  - g. Provision of recreational, hobby or library facilities for children as well as guidance, counseling in the premises
  - h. Coordination and collaboration with religious and civic organizations or authorities in the interest of child advocacy.
  - i. Other activities in the area of child advocacy

4. An entry to this contest shall be sent to the Committee on Awards by the President of the component society to reach the committee not later than March 15. This will be in the form of written report of the activity or activities in child advocacy undertaken by the component society. The report may deal with one or more of the activities mentioned in No. 3 above.
5. The criteria for judgment are:
  - a. Positive effect in the lives of the children covered by the activity 50%
    - Number of children who benefitted from program 15%
    - Positive impact of program to lives of children 20%
    - Sustainability of the endeavor 15%
  - b. The difficulty of the work encountered by members of the component society in furtherance of the activity/ties 40%
    - Activity done in marginalized community 15%
    - Difficulty of travel 10%
    - Limitation in resources 15%

<b>TOTAL</b>	<b>100%</b>

### **IX. PMA AWARD FOR MOST ACTIVE COMPONENT SOCIETY IN ENVIRONMENTAL AND SANITATION PROJECTS (initiated by Past President Nenita C. Lee Tan, MD)**

(First Prize only)

This award was initiated by Dr. Nenita C. Lee Tan to address one of the most prevalent problems in the country today. As the recognized organization in the country, it is but proper to raise standards of health education and services in the country through its component societies' members.

The criteria for the awards are as follows:

1. relevance to sanitation and environment	35%
2. impact on people	20%
3. innovation	20%
4. community mobilization	25%

### **X. DR. FE DEL MUNDO MEMORIAL AWARDS FOR OUTSTANDING SCHOOL COMMUNITY PROJECT (Initiated by Community Pediatric Society of the Philippines)**

Dr. Fe del Mundo established the first Pediatric Hospital in the country named Children's Medical Center Philippines ( CMCP) in 1957. Its main mission is to provide knowledge and skills to pediatric residents in the community setting through community involvement. The Children's Medical Center Philippines started its community outreach program in Mexico Pampanga in 1979 and later in San Idefonso, Bulacan, training Mother Health Workers. In 1989, the third community satellite was established in Liliw, Laguna.

In 1994 Dr. Fe Del Mundo founded the Community Pediatric Society of the Philippines (CPSP), an affiliate society of the PMA. In that same year, a child-to-child program for children was conceptualized as one of its flagship endeavors. Thus, springing from the mother Health Worker Program , the Bulilit Health Worker training program of school children was created to develop the enthusiasm to learn about health.

The program was brought to Batangas in 1996 due to a typhoid outbreak in San Jose, Batangas. This school based project was started in cooperation with the Lipa City Medical Society, CMCP and the Department of Education. The program developed into a foundation, officially registered with the Security and Exchange Commission last September 21, 1999. Dr. Fe Del Mundo was the Honorary Chairman with Dr. Benito P. Atienza as the Founding President. Enthusiasm and encouragement has spread far and wide to more elementary schools in the province of Batangas .

The objectives of this program are:

1. to organize a well-represented group of school children and teachers to be trained to promote health awareness, cleanliness, environment sanitation and conservation,
2. to provide a cost effective and innovative preventive health programs that will raise the standard health education among the elementary and high school students and its respective community,
3. to establish linkages with government and non-government organization together with local community associations now known as private-public partnership.

The project was recognized and awarded by the Philippine Medical Association, DepEd, and the Philippine Pediatric Society. It was also recognized by the World Health Organization and World Medical Association.

In 2010,the CPSP shared the Bulilit/Teen Health Workers training program with the Philippine Medical Association as part of the National Medicine Week Celebration. The program was adopted as one of the advocacy projects of the PMA with budget allocation of P50,000.00 as per Board Resolution # 094 series of 2010-2011.

In August 6, 2011, Dr. Fe Del Mundo died at the age of 99 years, 3 months before her Centennial birthday, thus the annual child activity day was dedicated to her during the Medicine Week Celebration. Thus, it was renamed Dr. Fe Del Mundo Bulilit & Teen Health Annual Congress.

Currently, more than 20,000 students had been trained all over the country. Most of them were successful in their chosen professions such as doctors, nurses, med tech, accountant, engineer, etc. Knowing the enthusiasm and zeal with which children embrace new pursuit and responsibilities, the Child Teen Health Workers Training Program has targeted the right segment of the society to further their goals in health promotion and hopefully instill a sense of pride and nationalism.

Thus, this award is dedicated to Dr. Fe Del Mundo, National Scientist, World Renowned Pediatrician and the first woman president of the Philippine Medical Association (1969-1970). Board Resolution #013 series of 2017-2018

**CRITERIA:**

- |  |      |
